

AM SCOPE

HL250-AS 150W Fiber Optical Microscope Illuminator Light Box

Features:

- Cool Light Illumination with Intensity Control
- Electricity Auto-Shut-Off Mechanism for Insuring Safety
- Ready for Attaching Fiber Optic Lamps

The AmScope HL250-A 150W Fiber Optical Microscope Illuminator Light Box offers 150 Watt halogen lighting, providing strong, even and cool daylight illumination. The light source comes with a built-in heat filter for cool light, a specially designed slot for color filters, and solid state controls for full adjustment of intensity. Its top window design is convenient for changing bulbs. Its auto-shut-off mechanism will cut off electricity automatically when the window is open. The light source comes with a two-step mounting adapter with 5/8" (16mm) and 25/32" (20mm) inside diameters for attaching fiber optic light cable, either gooseneck or ring. This cool high intensity lighting system is excellent for biological and electronic applications..

- Cool light illumination with intensity control
- Electricity auto-shut-off mechanism for insuring safety
- Ready for attaching fiber optic lamps
- Slot ready for inserting filters for changing light colors

This is a fiber optic dual light microscope illuminator in mint condition. Its top window design is convenient for changing bulbs. Its auto-shut-off mechanism will cut off electricity automatically when the window is open. Each metal-sheathed light cable is 22-inch long and can be bent into various positions. The lamp is 150Watt with fully adjustable intensity. This cool high intensity lighting system is excellent for biological and electronic applications

Note: Products with electrical plugs are designed for use in the US. Outlets and voltage differ internationally and this product may require an adapter or converter for use in your destination. Please check compatibility before purchasing.
